#### 4. OPERATING INSTRUCTIONS

- 4.1 Place the luggage on flat ground, making sure the upper handle is free of load. Power on the scale unit by pressing the button marked "ON/OFF".
- 4.2 Keep the luggage on the ground, wait for the zero to be displayed on the LCD.
- 4.3 Lift the luggage by the upper handle, and hold still for several seconds.
- 4.4 The total weight of the luggage will display on the LCD display.
- 4.5 Power off the scale by pressing the button marked "ON/OFF".

- 4.6 Press the button marked "KG/LB", the LCD display will toggle between KG/LB.
